TABRIZ LATIFOV

Generative AI & Software Engineer

Baku, Azerbaijan | +994 50 789 52 82 | latifovtebriz@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience in C# and the .NET ecosystem, microservices architecture, and DevOps practices, plus 2+ years of experience in Python development and AI/LLM engineering. Proven track record in designing scalable systems, automating CI/CD pipelines, and managing cloud infrastructure. Growing expertise in AI-assisted engineering, including Generative AI/LLM integration, RAG, embeddings, and vector search for enterprise and domain-specific use cases. Experienced in working within remote, distributed teams with a strong focus on microservice architecture and system optimization.

TECHNICAL SKILLS

Languages & Frameworks: C#, .NET Core, ASP.NET MVC, Web API, Python, FastAPI, Flask, Pandas, NumPy

DevOps & Cloud: Azure DevOps, Docker, Kubernetes, Terraform, Ansible, Prometheus, Grafana, ELK Stack, Linux OS

Databases: Microsoft SQL Server, PostgreSQL, Redis, Oracle Database, ClickHouse

Concepts & Tools: Web APIs, Microservice Architecture, CQRS, RabbitMQ, Kafka, DDD (Domain-Driven Design), SRE Practices, Agile/Scrum, Git, Generative AI/LLM Integration, RAG (Retrieval-Augmented Generation), Embeddings, Vector Search, Vector Databases (Pinecone, FAISS, Weaviate), LangChain, Prompt Engineering, LLM APIs (OpenAI, Anthropic Claude)

SOFT SKILLS

Problem Solving & Analytical Thinking, Self-Management & Adaptability, Effective Communication (Remote/Async), Team Collaboration & Mentorship, Critical Thinking, Time Management, Creative Innovation.

LANGUAGES

Azerbaijani – Native | Turkish – Native | English – C1 | German – A2

PROFESSIONAL EXPERIENCE

Software & AI Engineer *Dec 2025 – Present*
Ateshgah Insurance OJSC | Baku, Azerbaijan (Hybrid)
- Engineer insurance and fintech solutions using C#/.NET Core, ASP.NET Web API, MS SQL Server, and microservices.
- Integrate Generative AI, LLMs, ChatGPT, and Claude into development, debugging, testing, and documentation workflows.
- Explore local/self-hosted AI models, RAG, embeddings, and vector search for enterprise and insurance use cases.
- Apply AI-assisted engineering practices to improve development efficiency while maintaining code quality and security.

SRE & AI Engineer *Oct 2025 – Present*
Skolyn | Remote (Contract)
- Develop and maintain deployment and infrastructure workflows for a medical enterprise ERP platform.
- Design CI/CD, containerization, deployment automation, monitoring, and logging workflows.
- Apply AI-assisted approaches to infrastructure troubleshooting, log analysis, and operational automation.
- Work with Docker, Kubernetes, Linux, Azure DevOps, and cloud-native deployment practices.

Software Engineer (AI & Data Solutions) *May 2025 – Oct 2025*
Freelance | United States (Remote)
- Developed software solutions focused on Generative AI, LLM integration, and data-oriented applications.
- Built Python-based data processing and automation workflows for AI-enabled applications.
- Explored RAG, embeddings, vector search, and AI-powered information retrieval for structured and unstructured data.
- Applied LLMs and AI-assisted development across coding, debugging, testing, documentation, and automation.

Software & AI Engineer *Nov 2024 – May 2025*
DendClub | Remote (Contract)
- Developed software solutions for medical processes and workflow automation.
- Explored LLM and Generative AI integration for information processing and workflow automation.
- Applied AI-assisted development for implementation, debugging, testing, and documentation.
- Investigated RAG, semantic search, embeddings, and vector-based information retrieval for domain-specific data.

Software Engineer (Instructor) *Apr 2025 – March 2026*
CodeWorld | On-site (Contract)
- Teach C# programming, backend development, and software engineering principles.
- Introduce students to AI-assisted coding and LLM-based development workflows.
- Demonstrate LLM applications in code generation, debugging, refactoring, testing, and documentation.

Software Engineer (Instructor) *Aug 2024 – Feb 2026*
Software Village | Azerbaijan (Contract)
- Teach C# programming and software development.
- Provide practical guidance in backend development, programming fundamentals, debugging, and software engineering.

ICT Onsite Support Technician *Oct 2024 – Nov 2024*
Kronos | Baku, Azerbaijan (On-site)
- Provided on-site IT technical support services during COP29 Baku, Azerbaijan.

Software Engineer *May 2021 – Oct 2024*
TIC | United States (Remote)
- Developed full-stack web applications for US-based clients and software products.
- Worked on application development, debugging, integration, and software delivery.
- Collaborated within a remote international development environment.

EDUCATION

Bachelor of Science in Computer Engineering *Sep 2022 – Sep 2026*
Baku Engineering University | Baku, Azerbaijan

Computer Science and Programming *Aug 2024 – Nov 2024*
Massachusetts Institute of Technology (MIT) | Online

Algorithms: Divide and Conquer, Sorting and Searching *Jan 2024 – Apr 2024*
Stanford University | Online

Generative AI & Cloud Engineering Professional (60+ hours) *Nov 2024 – Apr 2025*
Udemy | Online

CONFERENCES & GLOBAL PROJECTS

Mindful Impact: Strengthening Youth Work From Within *Sep 2026*
Erasmus+ Training Course | Kobuleti, Georgia
- Participated in an international training focused on well-being, resilience, personal development, and sustainable youth work practices.
- Engaged in non-formal learning, international collaboration, and practical methodologies for improving impact in youth-focused projects.

Cool Facilitators *18–27 May 2026*
Erasmus+ Training Course | Mezőberény, Hungary
- Explored the ethical integration of AI and digital tools into Erasmus+ Youth Exchanges and educational activities.
- Co-designed human-centered and participatory methodologies with an international network of facilitators.

International Youth & Technology Program *Aug 2025 – Sep 2025*
European Solidarity Corps (ESC) & Turkish Federation | Ankara, Türkiye
- Participated in an international program focused on technology, leadership, teamwork, and youth engagement.
- Collaborated with international participants on cross-cultural and technology-related projects.

European Youth Development Project *Aug 2024 – Sep 2024*
Slovenian National Agency (MOVIT) | Slovenia
- Participated in international activities focused on youth development, digital skills, collaboration, and project management.
- Engaged with international participants through discussions, teamwork, and collaborative project activities.

KEY PROJECTS & RESEARCH

Scientific Researcher – Integrating Generative AI into Cloud-Native Systems *Jan 2026 – Sep 2026*
IAC 2026 Antalya

Scientific Researcher – The Role of Software Architectures in Space Systems *Jan 2025 – Sep 2025*
IAC 2025 Sydney

Scientific Researcher: "Will Artificial Intelligence Replace Humans?" *Jul 2024*
IKSAD Institute

Virtual Delegate for COP30 Brazil *Nov 2025 – Dec 2025*
United Nations
