TABRIZ LATIFOV

Generative AI & Software Engineer

Baku, Azerbaijan | +994 50 789 52 82 | latifovtebriz@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience in backend architecture and distributed systems (C#/.NET, microservices, cloud, DevOps), specializing in building, evaluating, and deploying production-grade Generative AI systems. 2+ years of hands-on work in Python and LLM engineering: Advanced RAG, tool-using agent workflows, vector search, and self-hosted open-source models (Llama, Mistral). Combines a solid systems foundation with rigorous LLM evaluation to deliver reliable, secure, and scalable AI solutions for enterprise and domain-specific use cases. Experienced in remote, distributed teams.

TECHNICAL SKILLS

AI & LLM Engineering: Advanced RAG, Tool-Using Agent Workflows, Prompt Engineering, Semantic & Vector Search, Document Data Extraction, Model Selection

AI Frameworks & Tools: LangChain, LlamaIndex, OpenAI API, Anthropic Claude, Open-Source Models (Llama 3, Mistral via Ollama/vLLM)

Evaluation & Observability: Ragas, MLflow, LLM Output Evaluation (Accuracy, Relevance, Faithfulness), A/B Testing of Prompts & Pipelines

Vector Databases: Pinecone, FAISS, Weaviate, pgvector

Core Software & Systems: Python, FastAPI, C#, .NET Core, Microservices, PostgreSQL, MS SQL Server, Redis, Docker, Kubernetes, Linux, CI/CD

PROFESSIONAL EXPERIENCE

Software & AI Engineer | Dec 2025 – Present
Ateshgah Insurance OJSC | Baku, Azerbaijan (Hybrid)

- Engineer insurance and fintech microservices using C#/.NET Core, ASP.NET Web API, and MS SQL Server.
- Integrate LLM-driven workflows into policy automation, combining core transactional services with Generative AI capabilities.
- Evaluate enterprise RAG architectures and self-hosted open-source models (Llama, Mistral) for privacy-conscious processing of sensitive insurance data.
- Apply AI-assisted engineering across development, debugging, testing, and documentation while maintaining code quality and security standards.

SRE & AI Engineer | Oct 2025 – Present
Skolyn | Remote (Contract)

- Architect high-availability cloud infrastructure for a medical enterprise ERP platform using Docker, Kubernetes, Linux, and Azure DevOps.
- Engineered automated CI/CD pipelines, containerized deployments, and monitoring and logging workflows.
- Streamlined incident response with AI-assisted troubleshooting and automated log analysis.

Software Engineer (AI & Data Solutions) | May 2025 – Oct 2025
Freelance | United States (Remote)

- Engineered end-to-end autonomous multi-agent systems in Python with LLM integration and tool-using workflows.
- Implemented deterministic guardrails to keep agent behavior predictable and controllable.
- Built pgvector-based semantic search and retrieval over structured and unstructured data.
- Developed Python data-processing and automation pipelines powering AI-enabled applications.

Software & AI Engineer | Nov 2024 – May 2025
DendClub | Remote (Contract)

- Developed workplace and clinical workflow automation software for medical processes.
- Built RAG pipelines with LlamaIndex and LangChain, using document embeddings for semantic Q&A over domain-specific data.
- Applied AI-assisted development to implementation, debugging, testing, and documentation.

Software Engineer (Instructor) | CodeWorld (Apr 2025 – Mar 2026) and Software Village (Aug 2024 – Feb 2026) | Contract

- Taught C#, backend development, and software engineering principles across two programs.
- Introduced AI-assisted coding and LLM workflows for code generation, debugging, refactoring, testing, and documentation.

ICT Onsite Support Technician | Oct 2024 – Nov 2024
Kronos | Baku, Azerbaijan (On-site)

- Delivered on-site IT technical support during COP29 Baku.

Software Engineer | May 2021 – Oct 2024
TIC | United States (Remote)

- Developed full-stack web applications and software products for US-based clients.
- Handled application development, debugging, integration, and delivery within a remote international team.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Engineering | Sep 2022 – Sep 2026
Baku Engineering University | Baku, Azerbaijan

Generative AI & Cloud Engineering Professional (60+ hours) | Nov 2024 – Apr 2025
Udemy | Online

Computer Science and Programming | Aug 2024 – Nov 2024
Massachusetts Institute of Technology (MIT) | Online

Algorithms: Divide and Conquer, Sorting and Searching | Jan 2024 – Apr 2024
Stanford University | Online

RESEARCH

- **Scientific Researcher, Integrating Generative AI into Cloud-Native Systems** | IAC 2026 Antalya | Jan 2026 – Sep 2026
- **Scientific Researcher, The Role of Software Architectures in Space Systems** | IAC 2025 Sydney | Jan 2025 – Sep 2025
- **Scientific Researcher, "Will Artificial Intelligence Replace Humans?"** | IKSAD Institute | Jul 2024
- **Virtual Delegate, COP30 Brazil** | United Nations | Nov 2025 – Dec 2025

INTERNATIONAL PROGRAMS

- **Mindful Impact: Strengthening Youth Work From Within** | Erasmus+ Training Course, Kobuleti, Georgia | Sep 2026
- **Cool Facilitators** | Erasmus+ Training Course, Mezőberény, Hungary | 18–27 May 2026. Explored the ethical integration of AI and digital tools in educational activities.
- **International Youth & Technology Program** | European Solidarity Corps & Turkish Federation, Ankara, Türkiye | Aug – Sep 2025
- **European Youth Development Project** | Slovenian National Agency (MOVIT), Slovenia | Aug – Sep 2024

LANGUAGES

Azerbaijani (Native) | Turkish (Native) | English (C1) | German (A2)
